

ngsai::genome::GenomeRegion

```
graph BT; A[ngsai::genome::CpGRegion] --> B[ngsai::genome::GenomeRegion]
```

The diagram illustrates a class inheritance relationship. A light gray box at the bottom contains the text 'ngsai::genome::CpGRegion'. A blue arrow points vertically upwards from this box to a white box at the top containing the text 'ngsai::genome::GenomeRegion'. This indicates that 'CpGRegion' inherits from 'GenomeRegion'.
